

PROJECT UPDATE / A REDEMPTIVE TECHNOLOGY HACKATHON

CareRide

A little help, A way forward.

Connecting people to the care they need.

People without reliable transport or digital access can struggle to reach hospitals, shelters, and essential services.

PROBLEM DEFINITION

Care exists.
Getting there is the gap.

01

Essential journeys

Hospitals, shelters, and services.

02

Digital barriers

Some clients cannot book a ride independently.

03

Fragmented coordination

Staff need a shared way to arrange and track rides.

The Friday challenge: Belkin Communities of Hope, Salvation Army

POTENTIAL IMPACT

A seat in a car can
open a door to care.

01

For clients

A more reachable path to
essential care.

02

For staff

Less uncertainty and fewer
scattered handoffs.

03

For communities

A practical way to turn
willingness into help.

Potential to serve more shelters, churches, and service organizations.

OUR APPROACH

Staff arrange. Drivers respond.
Care stays connected.

**Staff book****Drivers accept****Staff track**

HACKATHON MVP · Free rides · No client smartphone required

Assumptions to test: organization support and enough eligible drivers.

THE RESULT & LIVE DEMO / 2 MINUTES

One request. One driver. A journey to care.

Staff + driver screens · Booking + acceptance · Tracking + notifications

STAFF REQUEST

DRIVER RESPONSE

Request → Accepted → Picked up → Completed

THE STORY

One team. One complete journey.

01

Our focus

Complete the staff-to-driver journey.

02

Our challenge

Bring interface, API, and deployment together.

03

Our lesson

Test the handoffs, not just the screens.

Derek · Kenton · Eashan · Chong

THANK YOU & NEXT STEPS

Thank you.

Help us make a way forward.

01

Validate with staff

Test with a willing organization and real operating needs.

02

Agree the process

Confirm approval, coordination, and pilot ownership.

03

Keep building

Strengthen integration and ongoing maintenance.

Help us test it, offer a ride, or keep building.

A little help, A way forward. Connecting people to the care they need.
